**H1N1 Update:**

The Jefferson County Health Department is working with state officials to provide FREE federal H1N1 vaccinations per ACIP guidelines once the vaccine has been approved for administration and is available. H1N1 vaccination clinics could be held as soon as November 2009. Another ad announcing that schedule of dates, locations, and times will be published when these details can be determined. The ACIP has announced that the public should anticipate pregnant women, children and young adults under the age of 25, and healthcare workers to be the immunized prior to other individuals in the community.

Find the most current H1N1 vaccine recommendations posted on the following websites:
